

Fresh Air Energy Recovery

New Lossnay technology from Mitsubishi Electric is revolutionising home ventilation standards. The environmentally friendly 'energy recovery' system means that energy within the stale air can be recovered and used to pre-heat or pre-cool the fresh air being vented in so the need for additional heating is reduced and so is your power bill.

- Draws in fresh outdoor air
- Circulates air continuously
- Reduces moisture
- Filters dust & allergens
- 'Energy recovery' transfers heat to keep heating bills down 5 year parts & labour guarantee
- 'Whisper' quiet operation

Fresh Air Energy Recovery Ventilation

For a healthier, drier home!

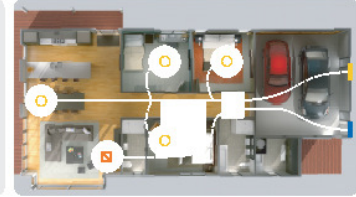

World Leader in ventilation systems, Mitsubishi Electric's patented Fresh Air Energy Recovery System is now available in New Zealand. Because the Lossnay uses fresh air (not attic air) to ventilate your home, you get the best of both worlds - fresh air into the home whilst reducing dampness - and without the energy loss that most alternative systems cannot prevent.

Lossnay Package Offer!

FROM
\$2999
 Installed*

Genuine Energy Recovery Ventilation System

- EXTRACTS AIR**
 Extracts stale air removing toxins and reducing humidity.
- SUPPLIES FRESH AIR**
 Supplies fresh air increasing the oxygen levels in the home and preventing the build up of moisture.
- ENERGY RECOVERY**
 Recovers the heat from the outgoing air to preheat the incoming air, saving you money.

Ventilation & Heating Offer!
